

## PRACTICAL 5

**Aim: Manage XenServer with XenCenter**

**Requirements: - 1.VM Ware**

**2. Xen Center**

**3.Xen Server 8**

**Steps:**

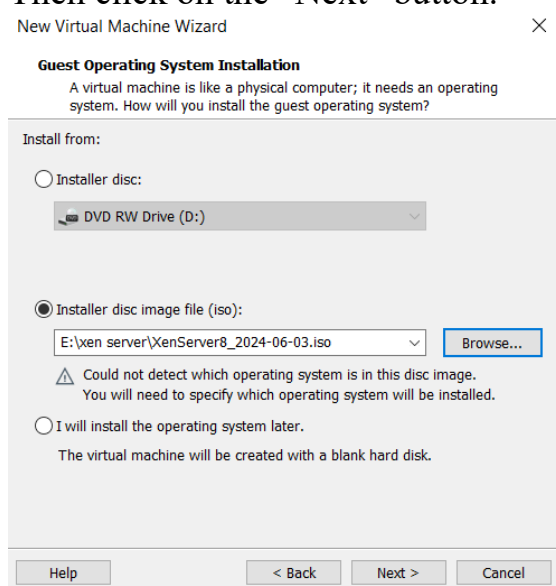

Step1: - Create a new Virtual Machine in VMware Workstation

File → New Virtual Machine

Step2: Select Typical (recommended) and click on “Next” button.

Step3: Select the iso file click on the Browse & select “XenServer-8.2.0- install-cd” file. Then click on the “Next” button.

Step4: Select Guest OS as “VMware ESXi” and Version as “VMware ESXi 5”. Give a name to the Virtual Machine as “Xen Server”.

New Virtual Machine Wizard

**Select a Guest Operating System**

Which operating system will be installed on this virtual machine?

Guest operating system

☐ Microsoft Windows

☐ Linux

☒ VMware ESX

☐ Other

Version

VMware ESXi 5.x

Help < Back Next > Cancel

New Virtual Machine Wizard

**Name the Virtual Machine**

What name would you like to use for this virtual machine?

Virtual machine name:

XEN SERVER

Location:

C:\Users\ADMIN\Documents\Virtual Machines\XEN SERVER

Browse...

The default location can be changed at Edit > Preferences.

< Back Next > Cancel

Step5: Select Maximum disk size 100 GB. Store virtual disk as a single file” and click on “Next.” Click on “Customize Hardware”

New Virtual Machine Wizard

**Specify Disk Capacity**

How large do you want this disk to be?

The virtual machine's hard disk is stored as one or more files on the host computer's physical disk. These file(s) start small and become larger as you add applications, files, and data to your virtual machine.

Maximum disk size (GB): 100

Recommended size for VMware ESXi 5.x: 40 GB

☒ Store virtual disk as a single file

☐ Split virtual disk into multiple files

Splitting the disk makes it easier to move the virtual machine to another computer but may reduce performance with very large disks.

Step6: At the Hardware window select Memory size as 2GB, Close and Click on “Finish”

Hardware

Device	Summary
Memory	4 GB
Processors	2
New CD/DVD (IDE)	Using file E:\xen server\Xen...
Network Adapter	NAT
USB Controller	Present
Display	Auto detect

Add... Remove

**Memory**

Specify the amount of memory allocated to this virtual machine. The memory size must be a multiple of 4 MB.

Memory for this virtual machine: 4096 MB

128 GB  
64 GB  
32 GB  
16 GB  
8 GB  
4 GB  
2 GB  
1 GB  
512 MB  
256 MB  
128 MB  
64 MB  
32 MB  
16 MB  
8 MB  
4 MB

Maximum recommended memory  
(Memory swapping may occur beyond this size.)  
9.7 GB

Recommended memory  
4 GB

Guest OS recommended minimum  
4 GB

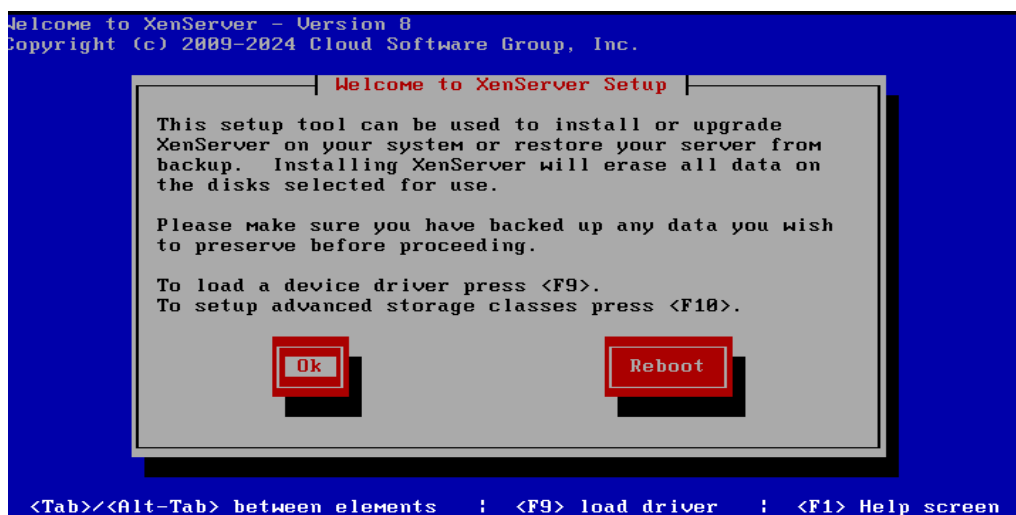

Close Help

Step7: Power ON the Xen Server

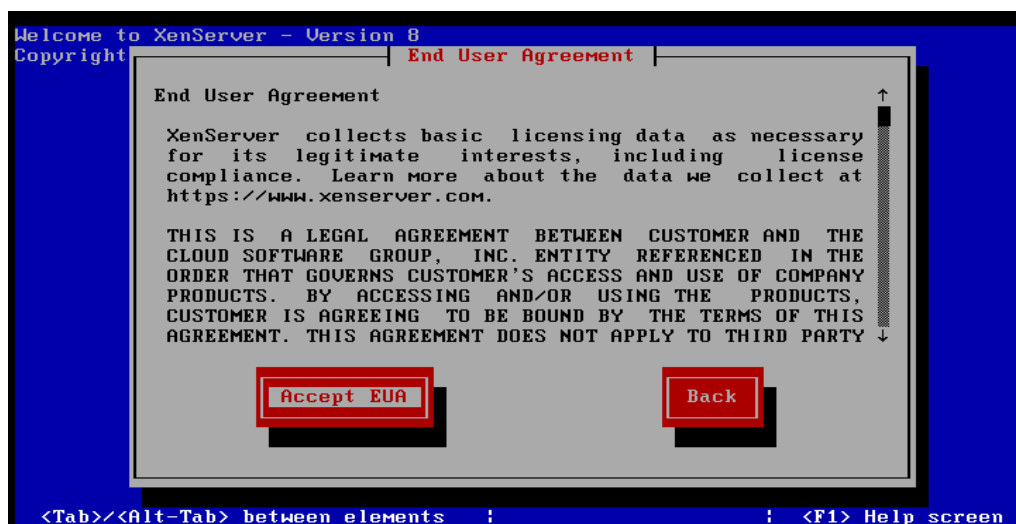

Step8: Select Keymap as [qwerty] us and press Enter.

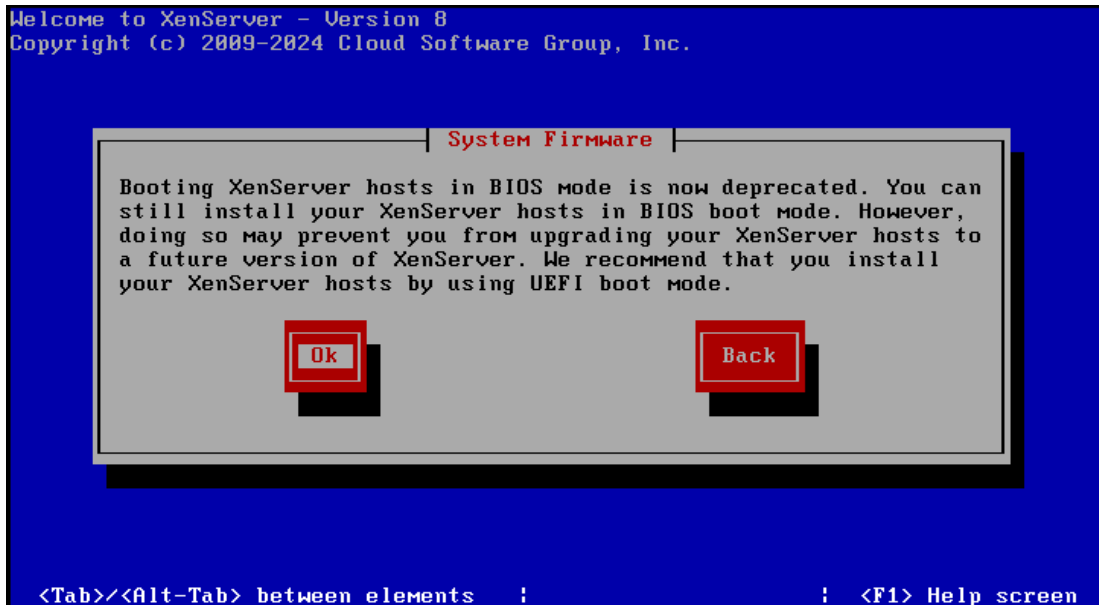

Step9: In the Welcome to XenServer Setup screen press Enter to choose Ok.

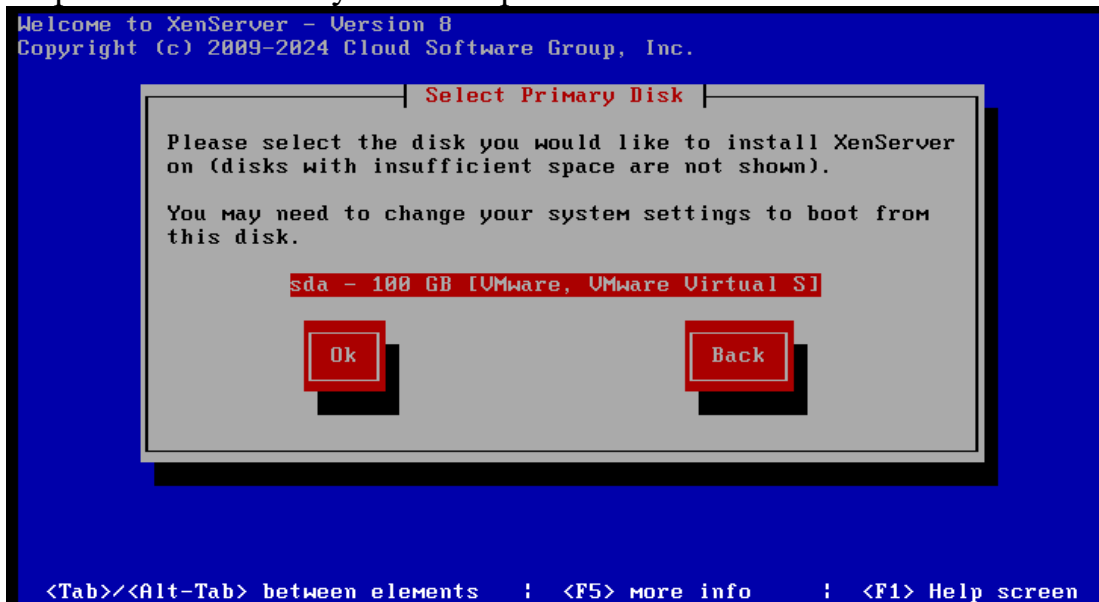

Step10: In End User Agreement Select Accept EUA

## Step11: In system Firmware Select OK

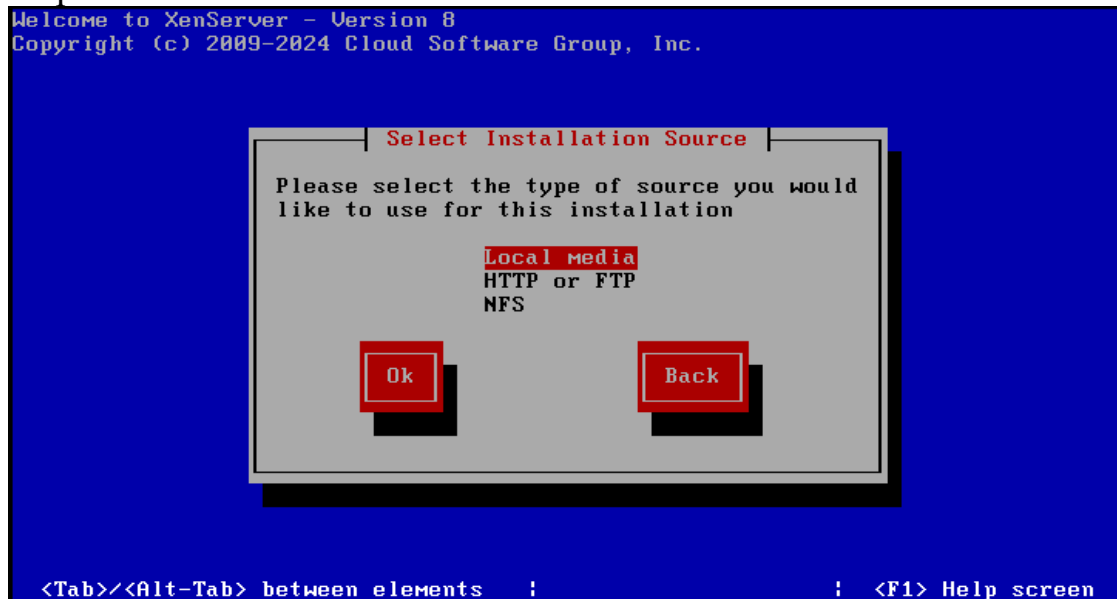

## Step12: Select Primary Disk and press OK.

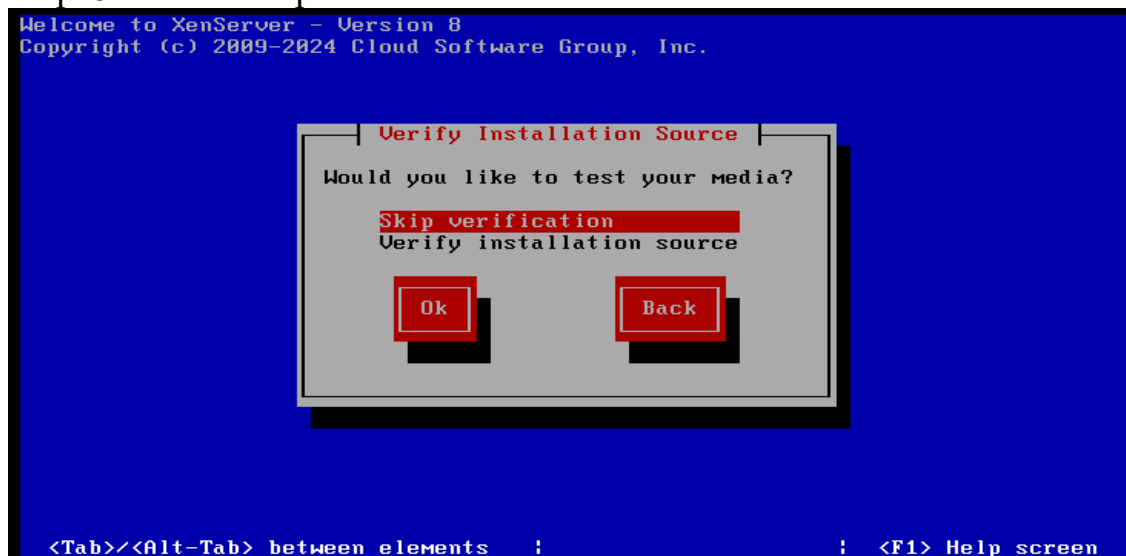

## Step13: In Virtual Machine Storage Type Select and press OK.

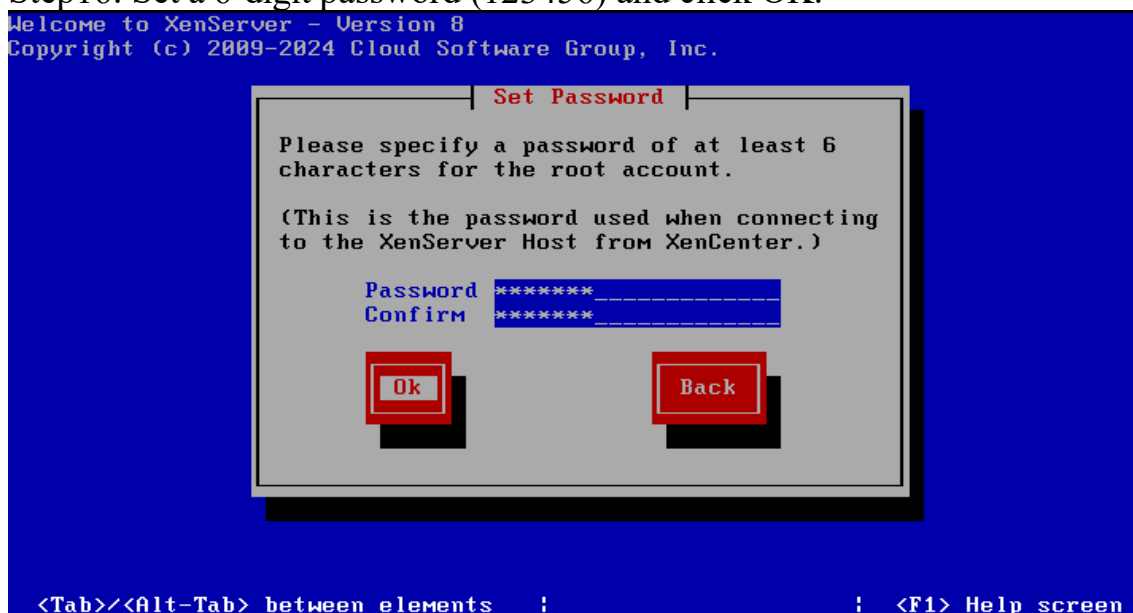

## Step14: Select Installation Source as Local Media

## Step15: Choose skip verification and click on ok.

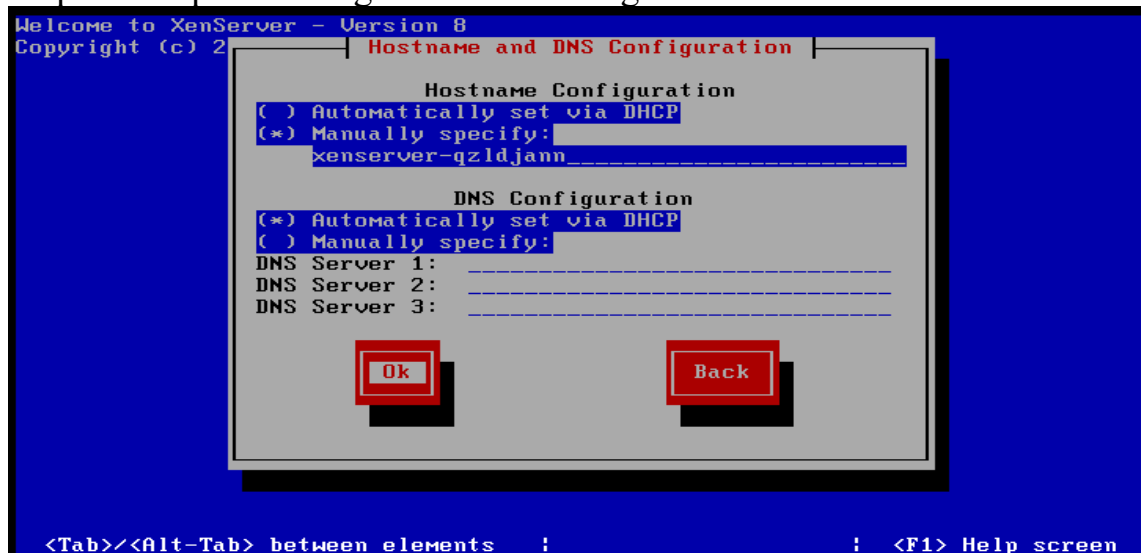

## Step16: Set a 6-digit password (123456) and click OK.

Step17: Keep the setting default and navigate to OK Button

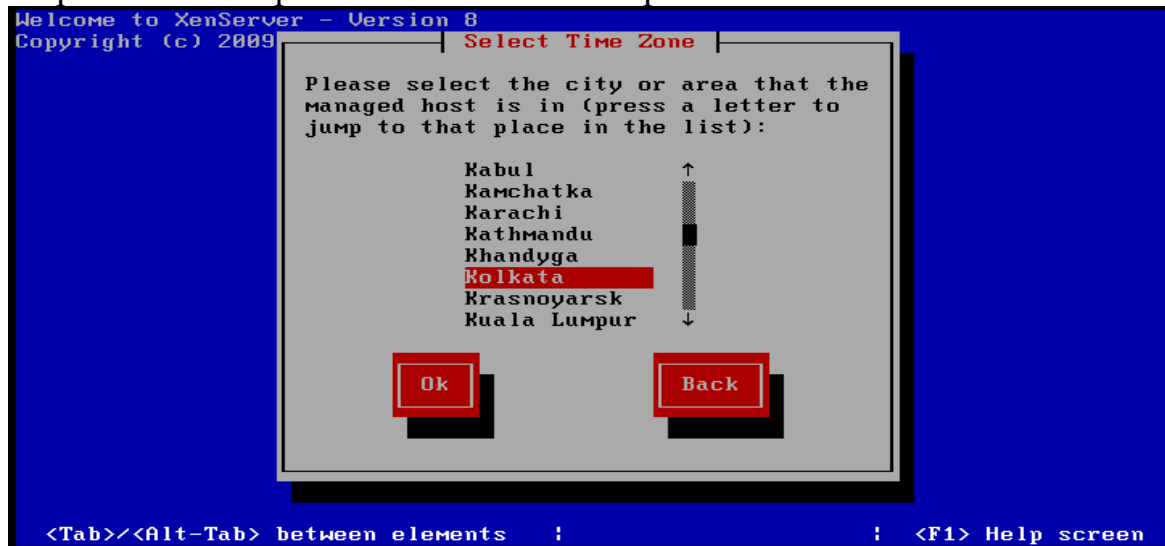

Step18: Keep the setting default and navigate to OK Button

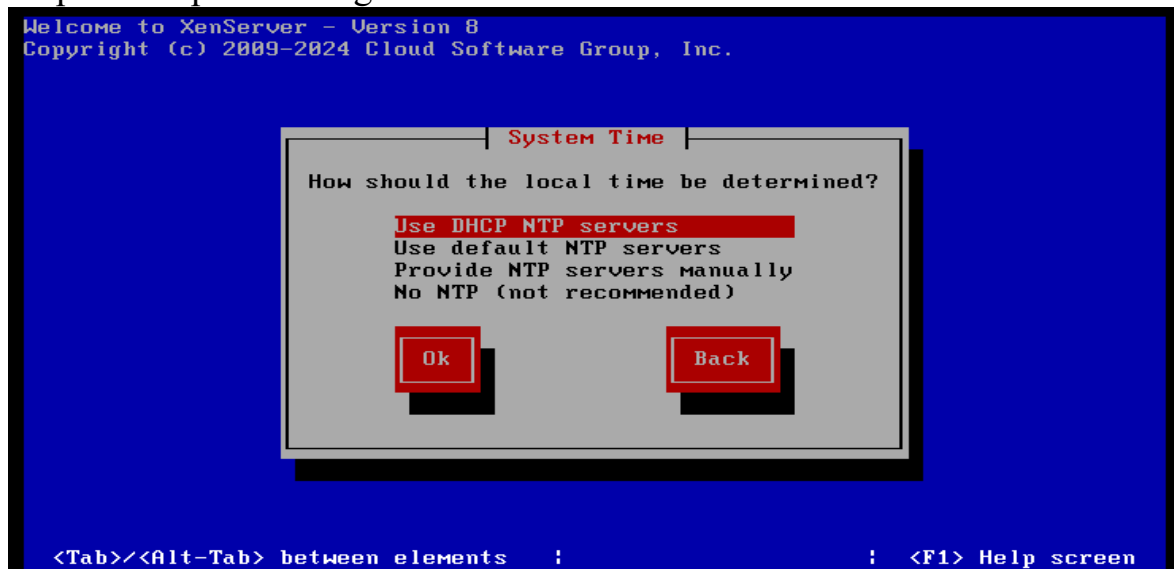

Step19: In the dropdown find Asia and press Enter.

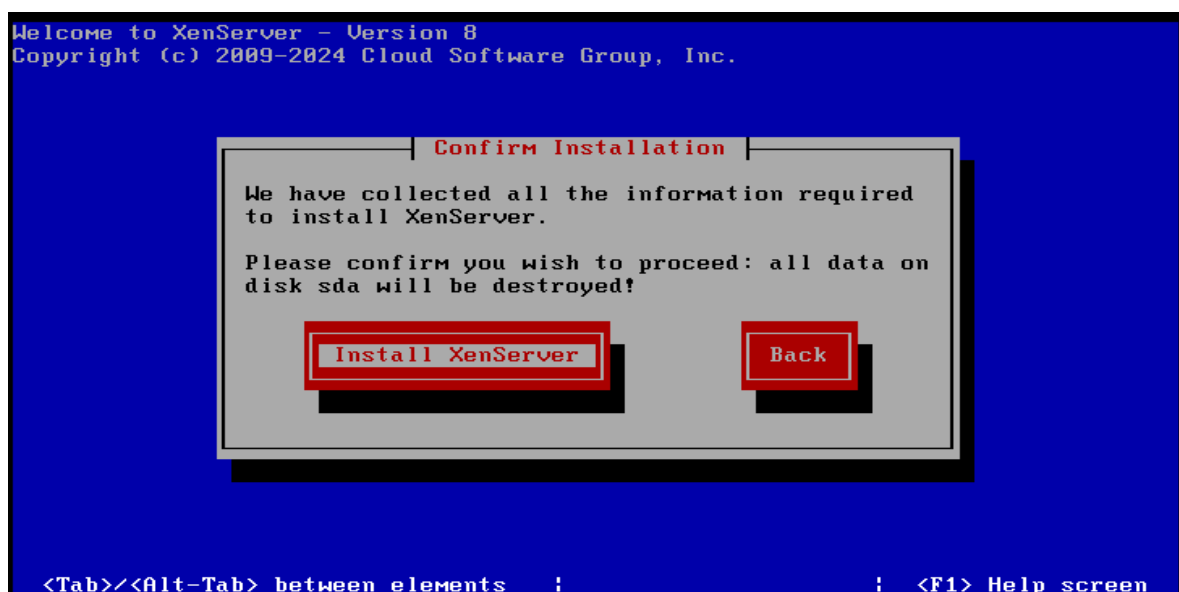

Step20: In the dropdown find Kolkata and press Enter.

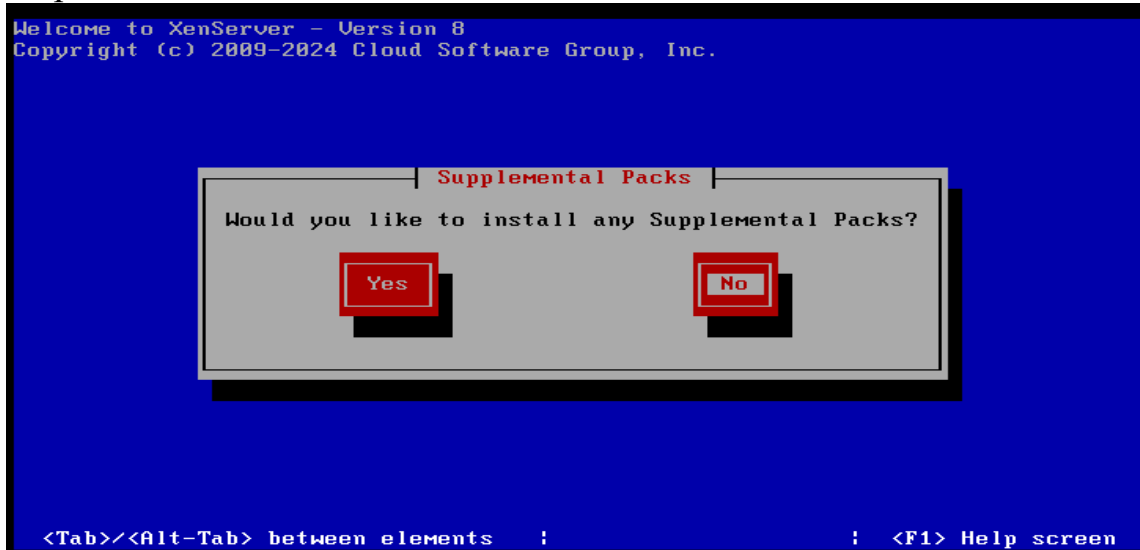

Step21: Keep the setting default & click on OK.

Step22: Click on Install XenServer.

Step23: Select No and the vm will reboot.

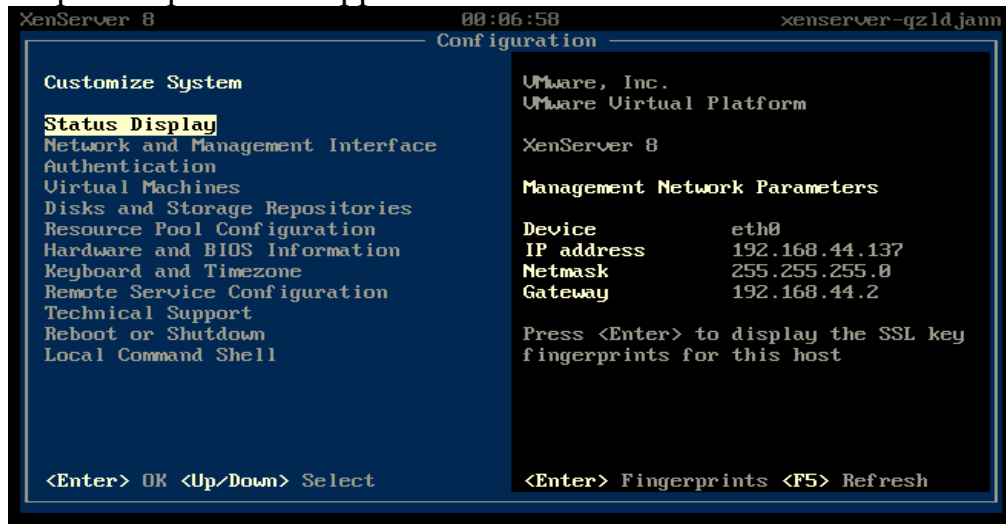

Step24: Press Enter

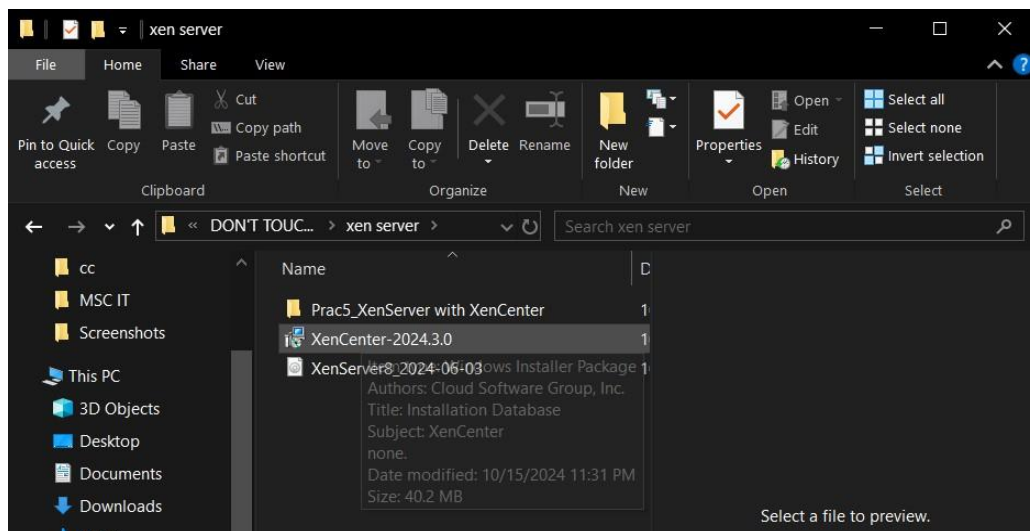

Step25: A panel will appear with wealth of information.

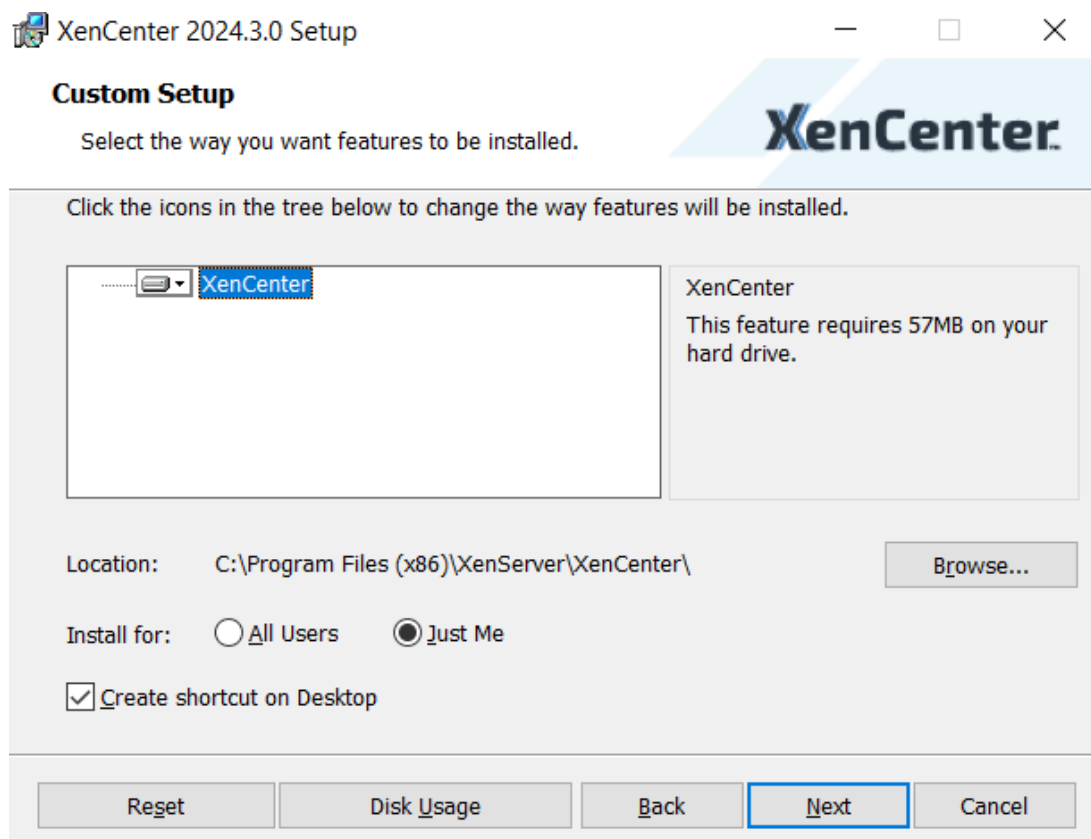

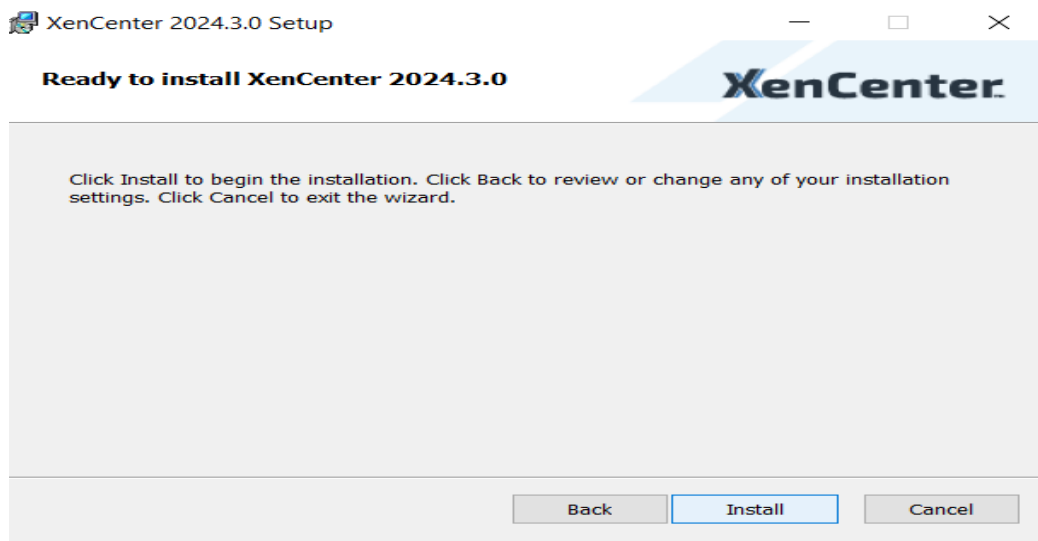

Step26: Now Install the Xen center application.

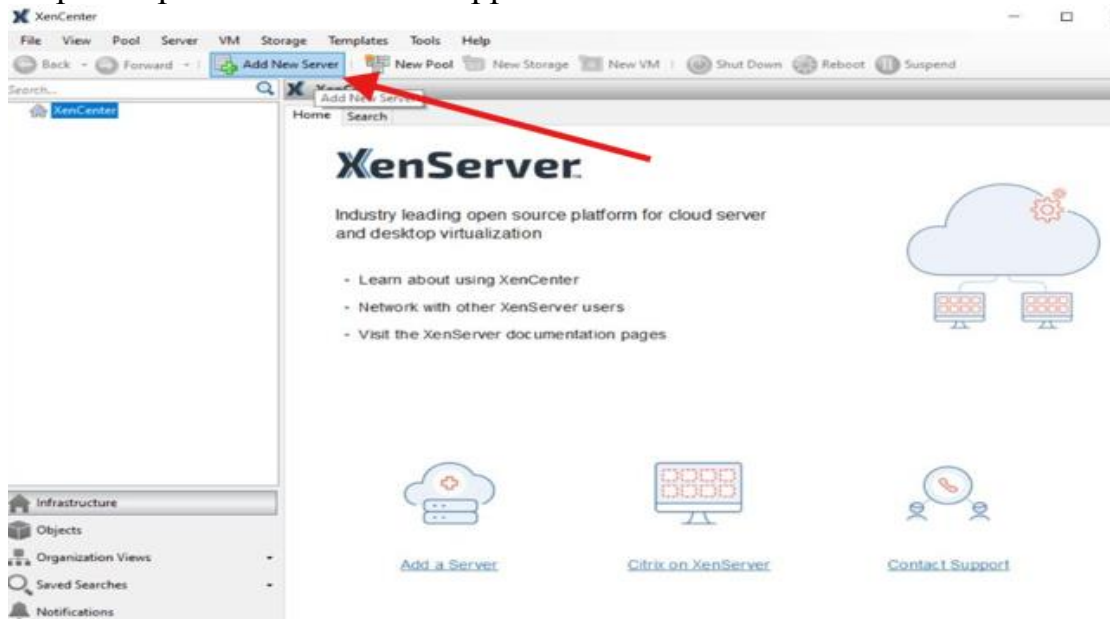

Step27: Click on Next

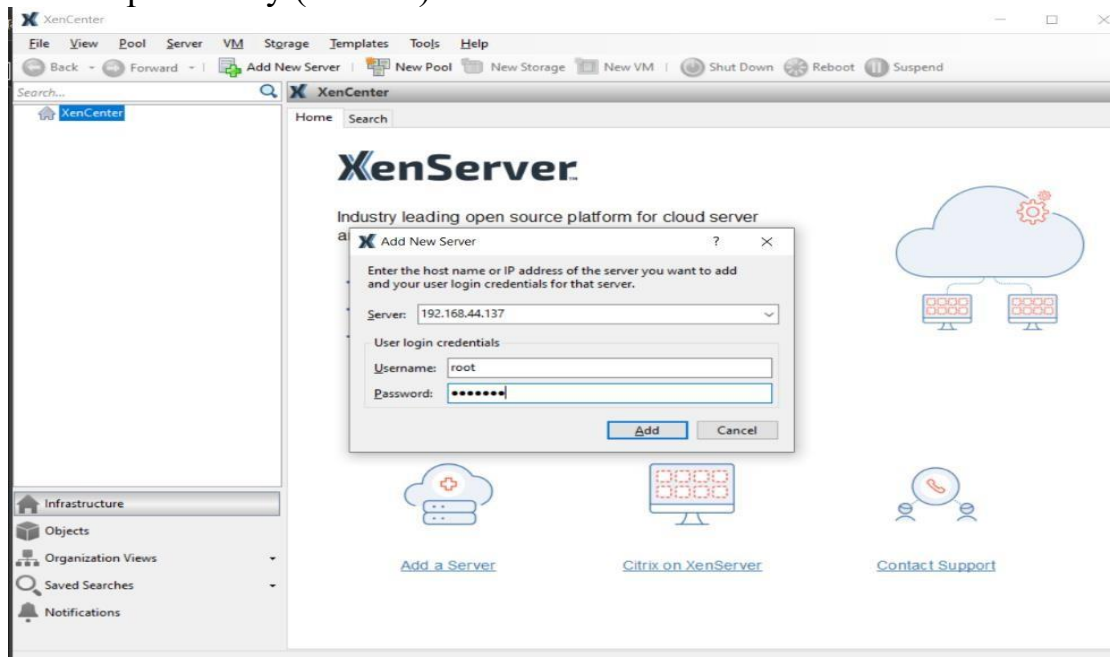

Step28: Click on Install & then Next.

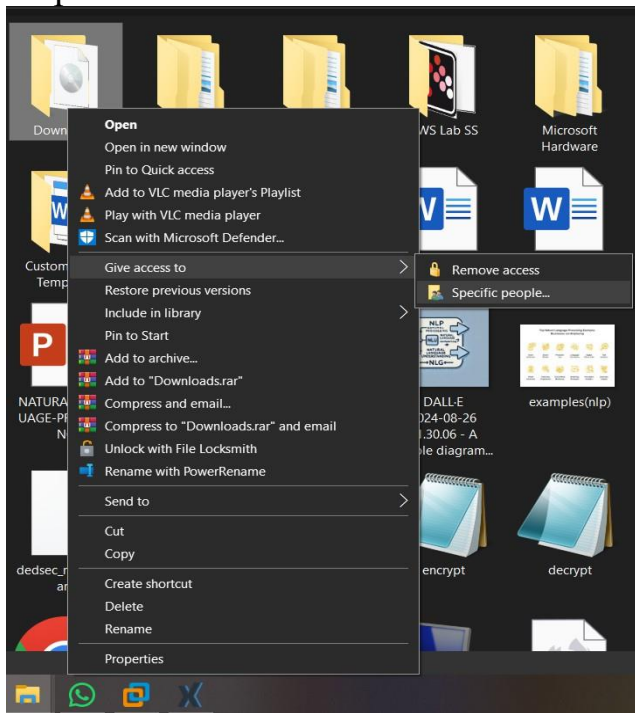

## Step29: Open the Xen Center app and Click on Add New Server

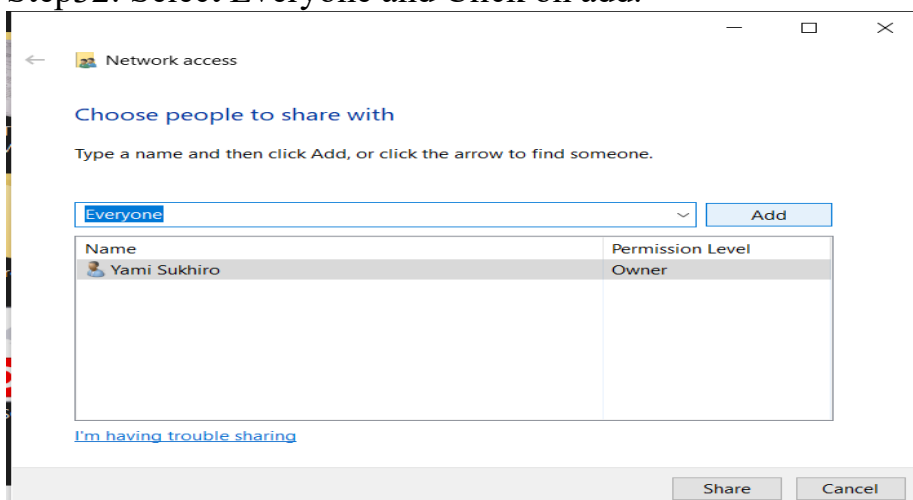

## Step30: Copy the Ip Address from the VMWare panel and put in 6-digit password which was set previously (123456).

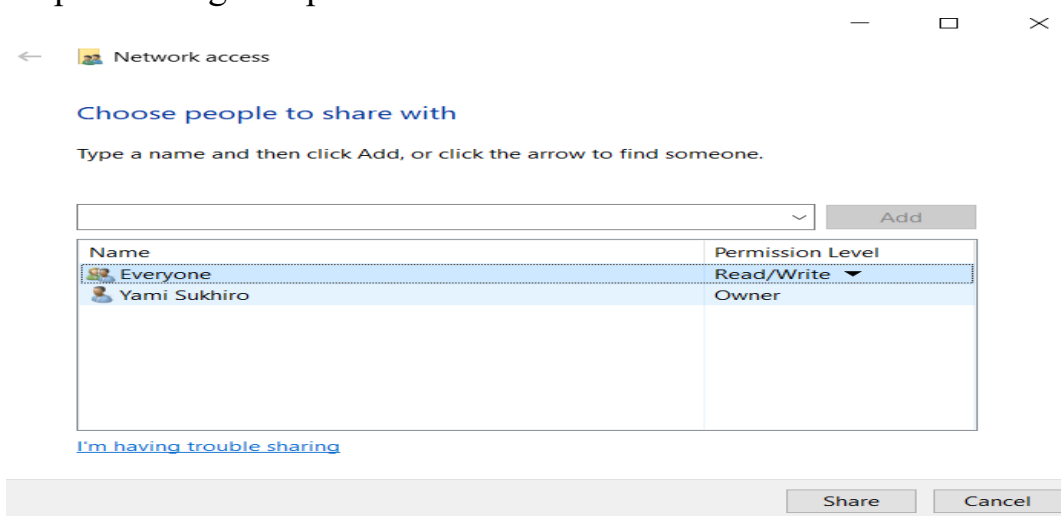

Step31: In the Base Machine Share an Iso file of Windows server 2022 over network.

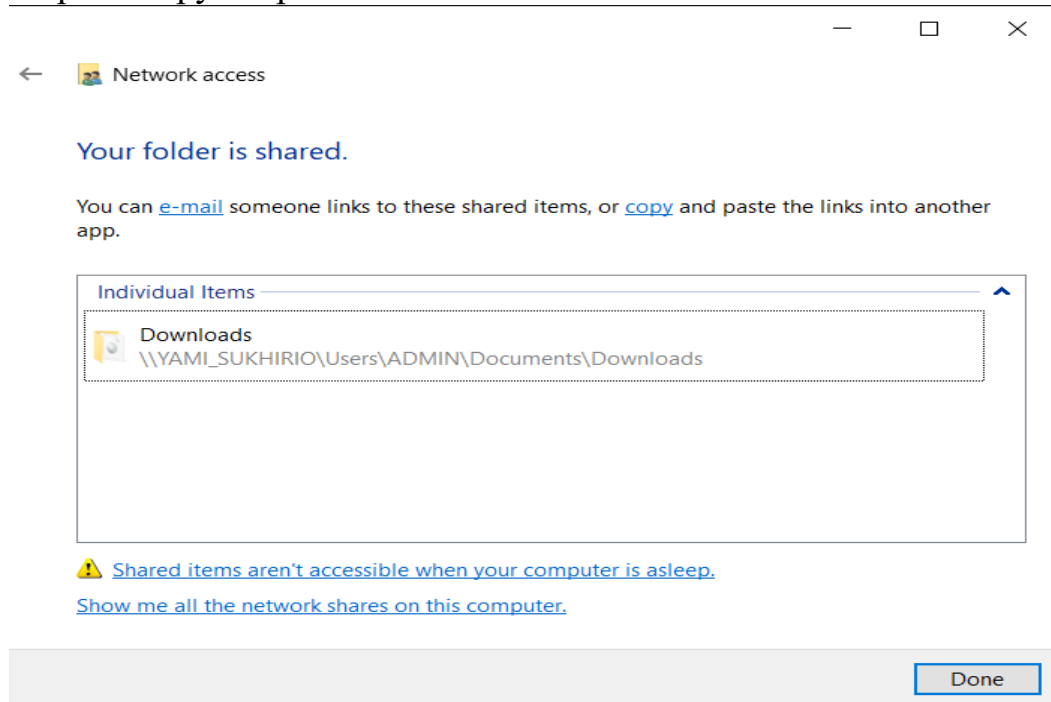

Step32: Select Everyone and Click on add.

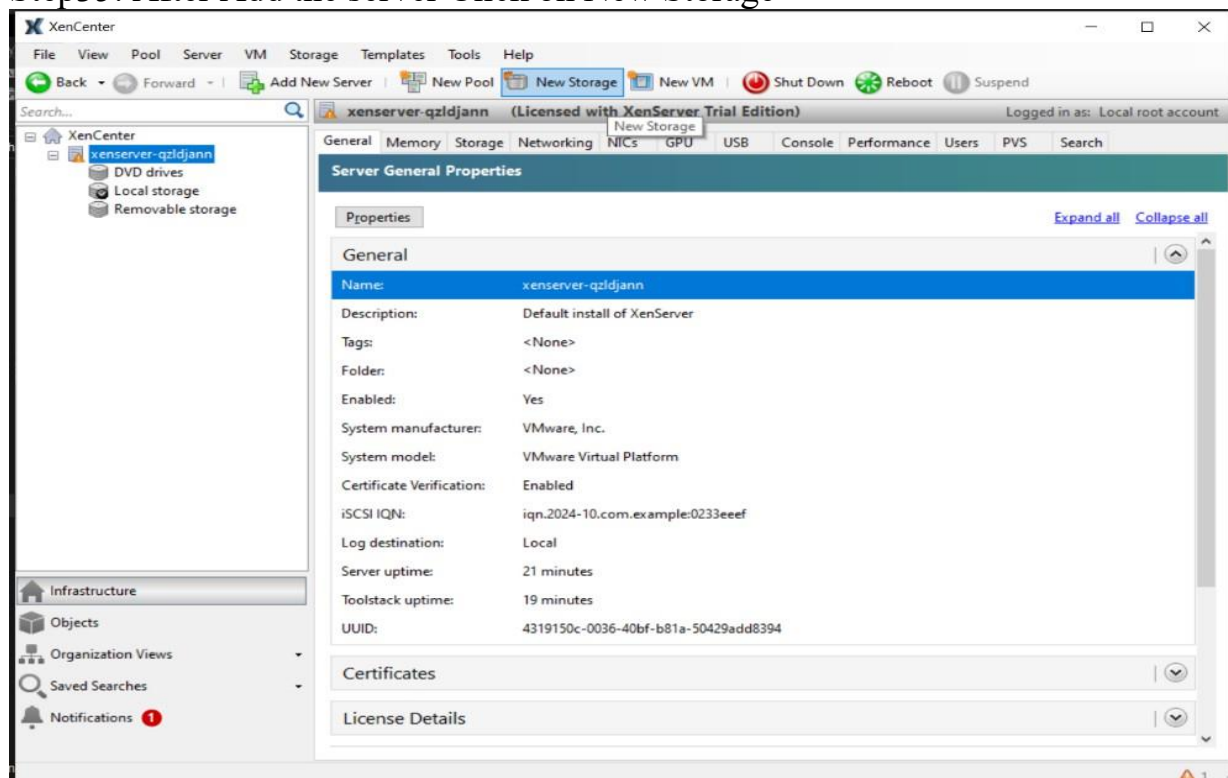

Step33: Change the permission level to Read/Write and click on Share.

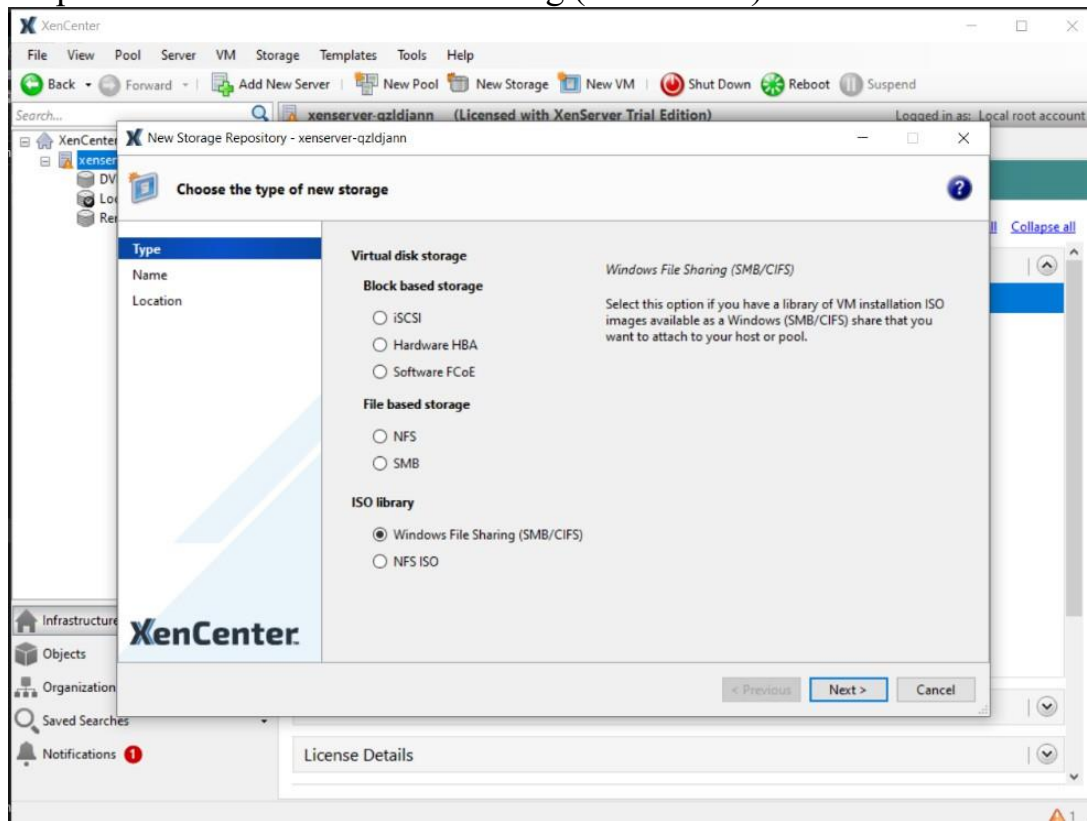

## Step34: Copy the path.

## Step35: After Add the server Click on New Storage

### Step36: Select Windows File Sharing (SMB/CIFS) and NEXT

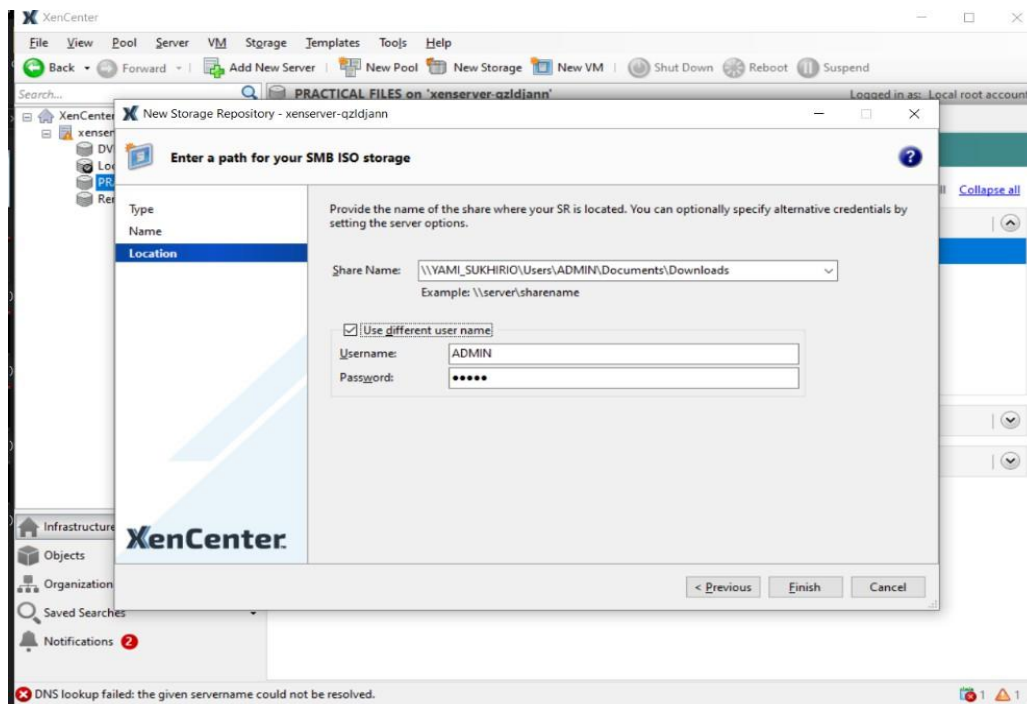

### Step37: Change name to “PRACTICAL FILES” and NEXT

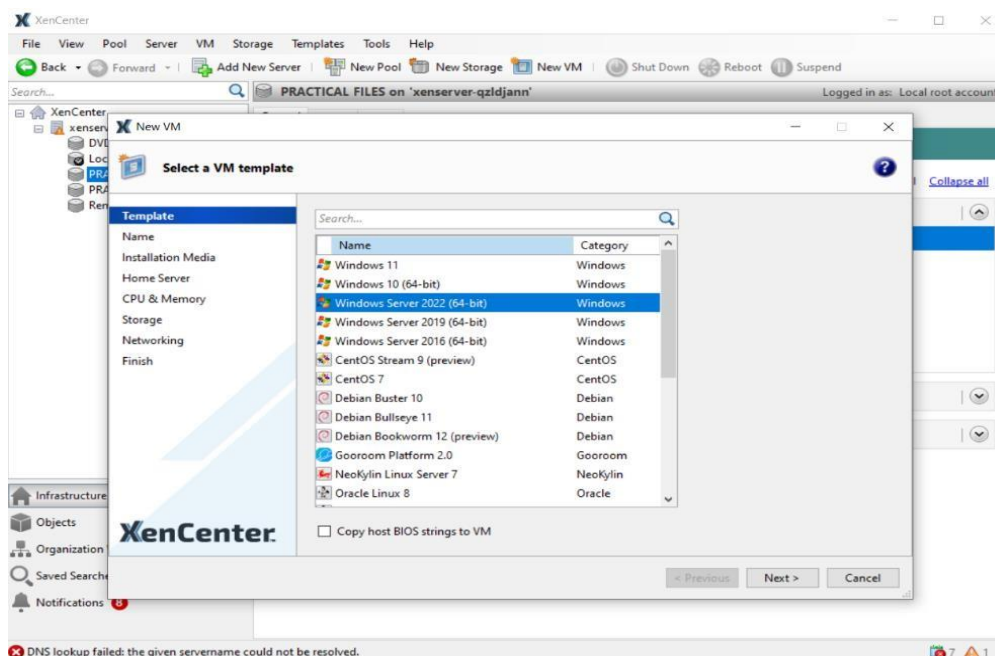

Step38: Paste the path of the file shared over the network.

(Remember file name should be written by \\Username\foldername\...)

eg: “\\Downloads\Windows\_server2022”

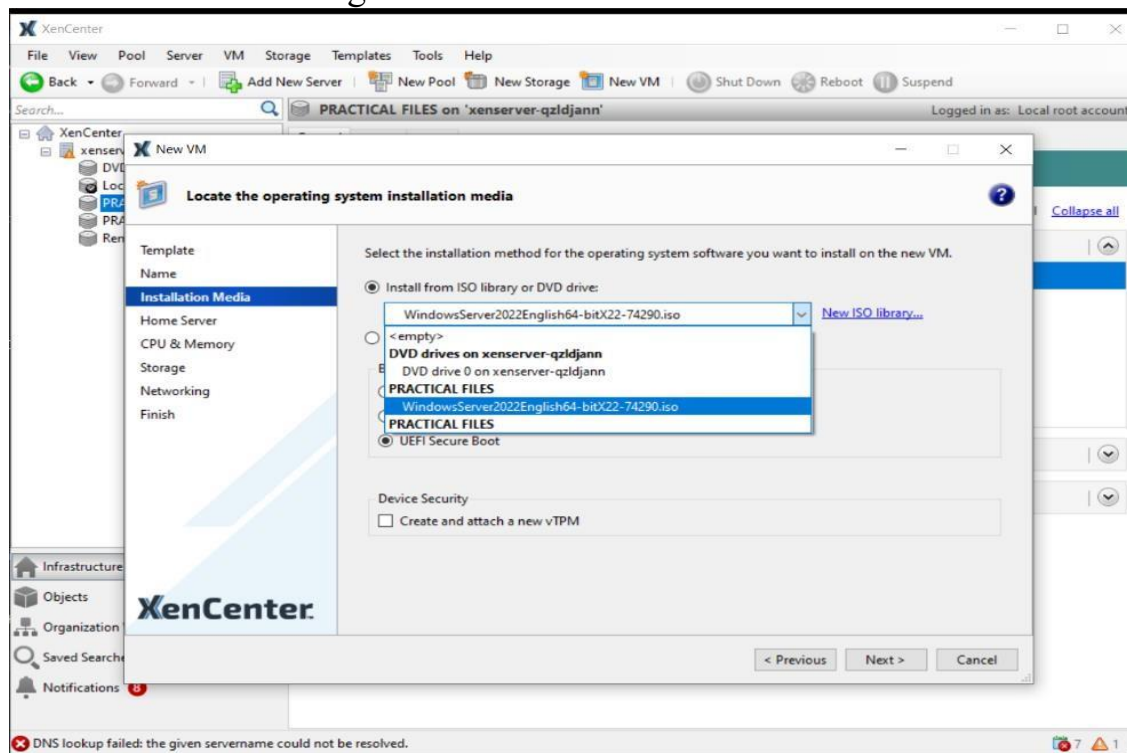

Step39: After adding a New Storage Click on New VM And Select Windows Server 2022(64-bit)

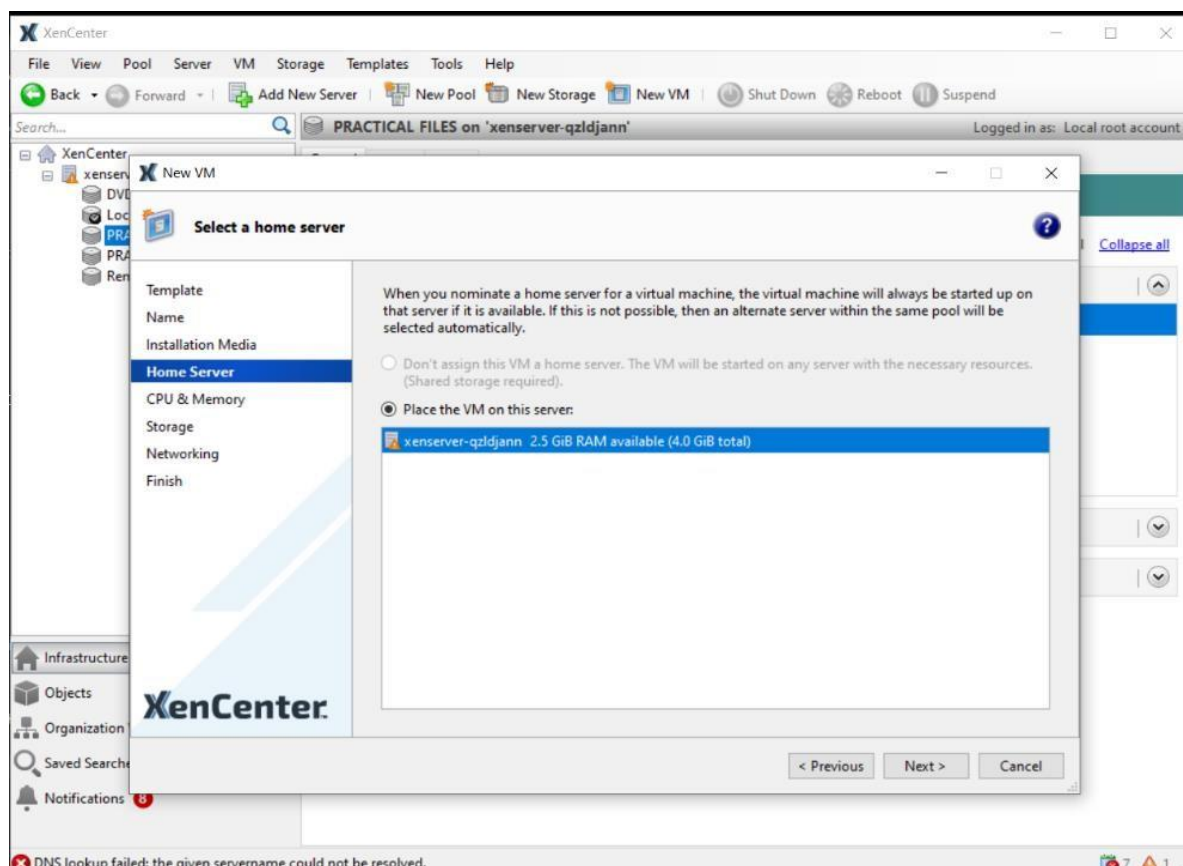

Step40: Select the ISO image which was shared over the network. -  
WindowsServer2022English64-bitX22-74290.ios

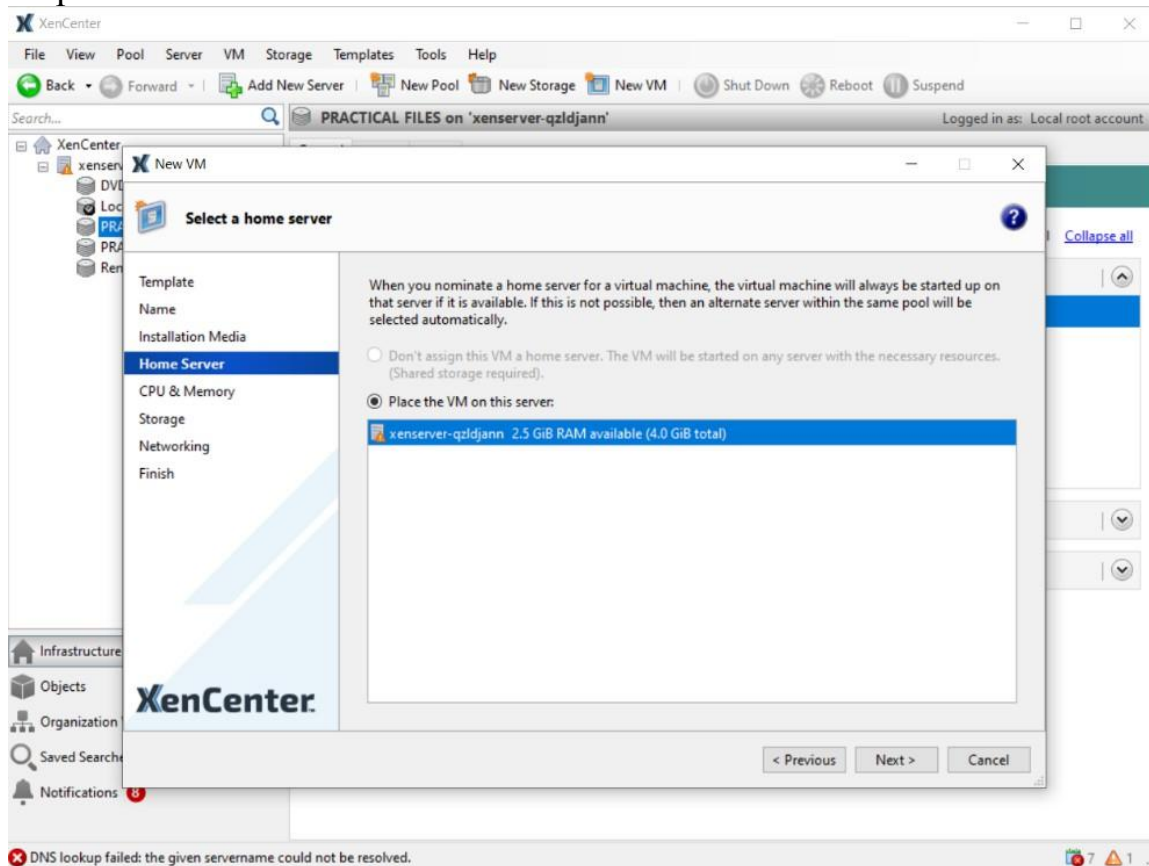

Step41: Click on Next

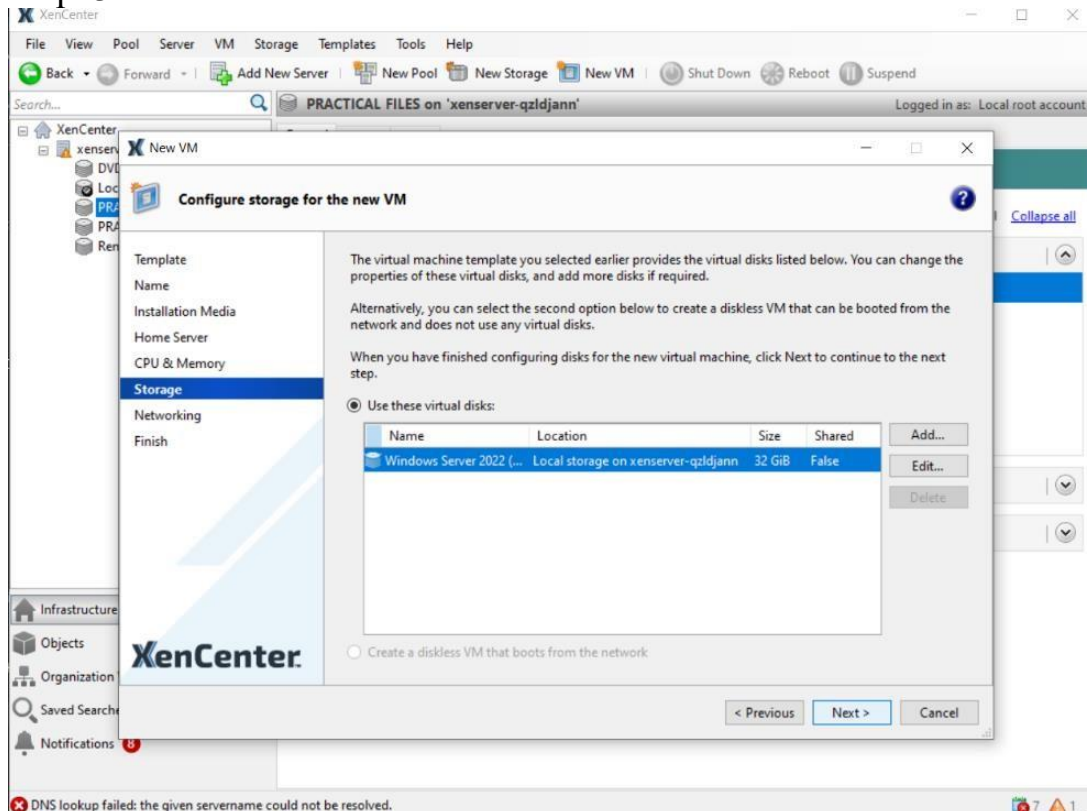

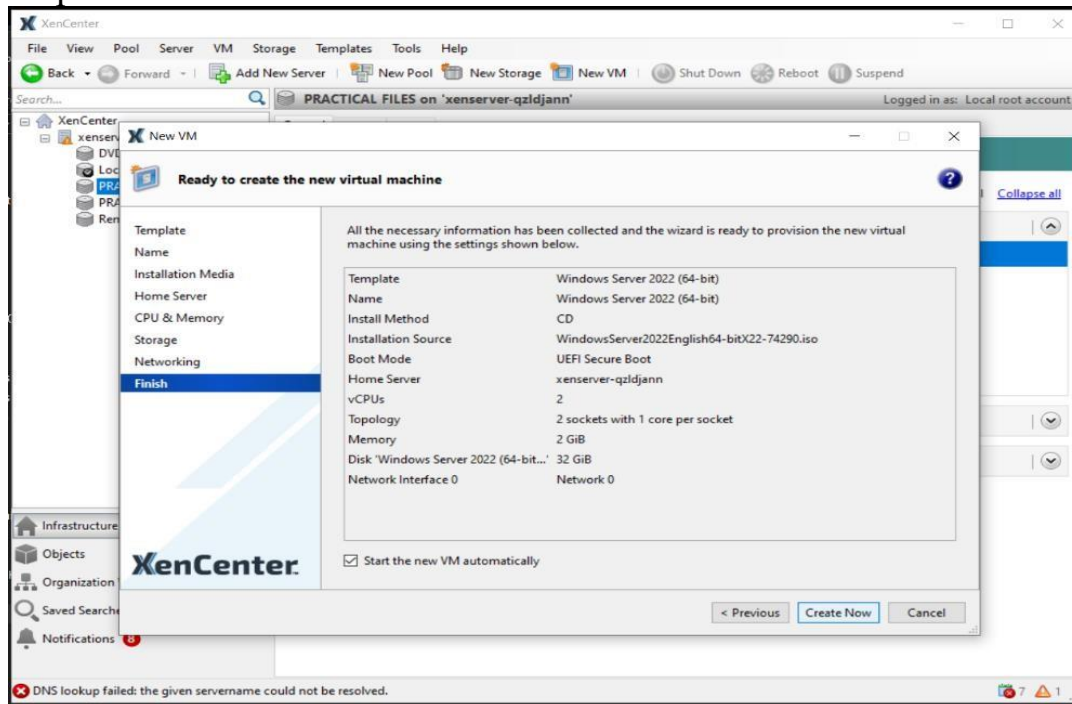

## Step42: Click on Next

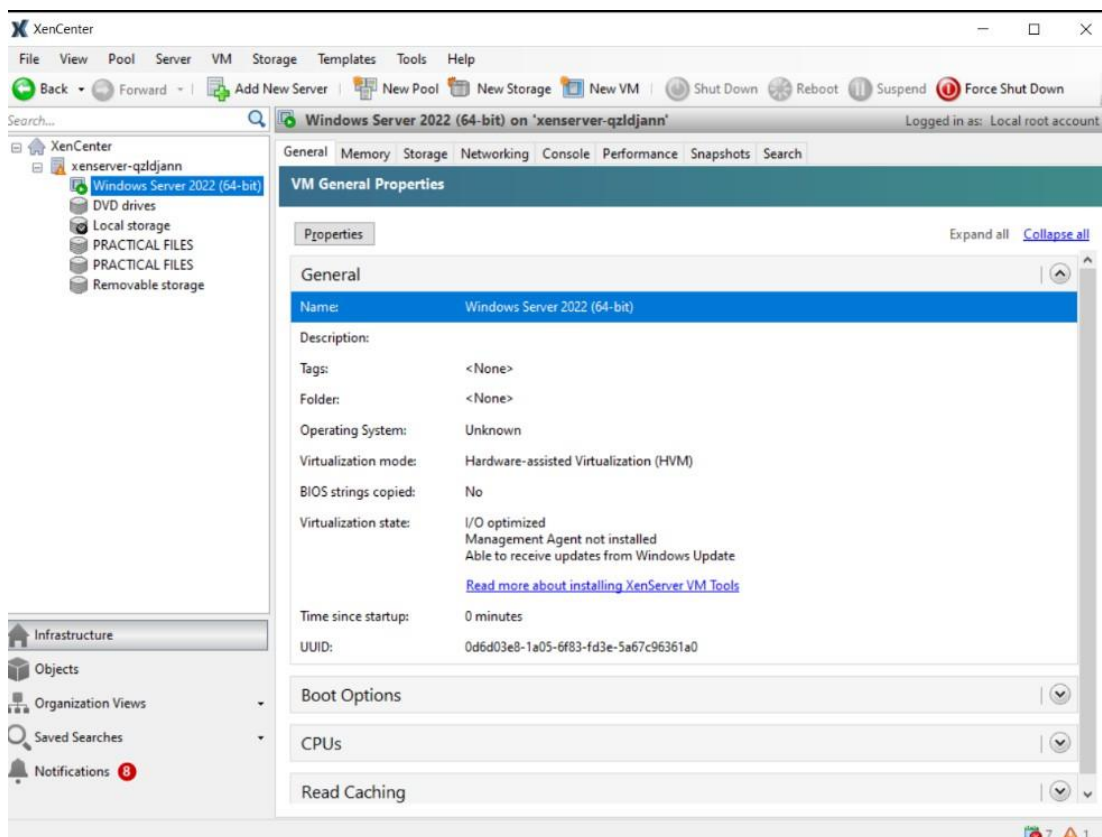

## Step43: Click on Next

## Step44: Click on Create Now

## Step46: Click on Windows Server 2022(64-bit) & Navigate to Console tab.

## Step47: Click on Install

## Step48: And Install Windows Server in Xen-Server
